

DFB

SOL-R-SHADE®

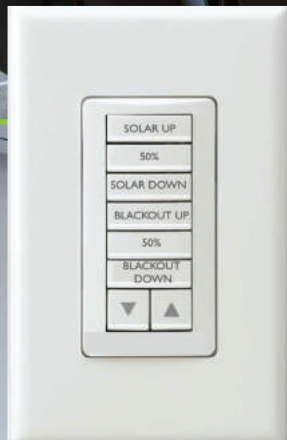

MANUAL SHADES

Visual Impact. Value. Versatility.

Selecting the right window coverings for your projects can have a huge impact on both the visual appeal and on practical issues, such as heat gain, glare and soaring energy costs. The DFB Sol-R-Shade offers unparalleled design options, as well as a range of manual roller shade systems which enable efficient installation and effortless operation for the end-user. Sol-R-Shades® offer a wide range of attachment options (such as fascia, contract pocket, and blackout side channels) while incorporating a 16 lbs. lift clutch system. All of DFB's products are manufactured in Long Island City, NY.

FUSION MOTORIZED SHADES

LOW VOLTAGE FUSION

This Fusion Low Voltage motor is the quietest on the market, rated 38 DbA. It offers a wide range of control options, simplifies wiring and ensures perfect shade alignment. One motor can operate up to 4 multi-banded shades. The intelligent encoded motors operate from a smart power and data panel. Fusion Low Voltage offers seamless integration with most lighting, BMS, AV systems. It can also link into the Horizon system for full automation.

LINE VOLTAGE FUSION

This Fusion Line Voltage motor is the quietest on the market, rated 38 DbA. It offers a wide range of control options, simplifies AC wiring and ensures perfect shade alignment. One motor can operate up to 5 multi-banded shades and is ideal for skylight solutions. The intelligent encoded motors are connected via a data bus line that connects seamlessly with most lighting, BMS, AV systems. Fusion Line Voltage can also link into the Horizon system for full automation.

SELECT FABRICS

G10-B

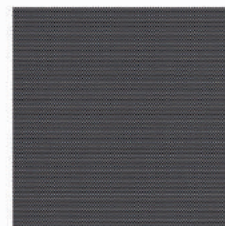

G10-B is the latest in innovative sun control fabric development. With all the benefits, certifications, and technical specifications you have come to expect from Sol-R-Control but uniquely designed for the demanding and competitive commercial market, G10-B is an ideal choice for your spec-driven projects that require noise reduction. A more robust core yarn is ideal for capturing and diffusing wave lengths at certain frequencies. Instead of the sound passing through the factor it was actually dissipated. Available in 3% and 5% openness factors.

G55

G55 sustainable Sol-R-Control® fabrics are eco-friendly full basketweaves designed to meet the most stringent environmental design standards. With 100% recycled content, 100% recyclable, and a PVC-free composition, G55 fabrics offer the same solar heat and glare control properties as traditional Sol-R-Control® fabrics for conserving energy, harnessing natural light and maintaining interior comfort levels. Available in 1%, 3%, 5%, and 10% openness factors.

Benefits of G55 include:

- 100% recyclable with active Reclamation Program that captures scrap from post-industrial (pre-consumer) and post-consumer sources
- Produced from 100% post-industrial (pre-consumer) recycled content
- Repeat recyclability for continued sustainability
- PVC-free
- Lead-free
- Every component of this TPO compound is heat and chemically stable.
- Resistant to microbial and fungal growth
- Durable and washable

ABOUT DFB

DFB Sales specializes in the manufacturing and installation of high quality, customizable window and interior finish products for commercial and high-end residential markets. We work directly with top architectural firms, designers and construction firms to enhance spaces through our unique product offerings.

DFB is geared to handle both small and large projects due to our scalable manufacturing processes. Because we make everything we sell, we directly support all of our products with simple and comprehensive warranties.

Direct Access

DFB Sales has a strong, multifaceted team, comprised with compartments ranging from estimating to product development to project management and sales. We take care of all the logistics for our clients, from project initiation to completion.

Diligence

DFB Sales ensures that every client is happy with their final selection of product. Our team walks through finished spaces to inspect our installations, ensuring that our delivery meets expectations and project timelines.

Delivery

Our facility is located in Long Island City, which is only minutes from midtown Manhattan. The majority of our client's projects are within New York City, which gives us the advantage of delivering products within short lead times.
