

BAFFLE

Acoustics play an integral role in any environment. DFB has developed various sound absorbing techniques including our Baffle system, which offers both a decorative and highly functional solution to noise reduction. This application is suspended from the ceiling and can be installed in a multitude of patterns.

When wrapped in fabric, Panel Tex Baffles offer a 1.0 Noise Reduction Coefficient (NRC) rating. DFB recommends Camira Blazer fabrics for this application, as well as our Quiet-Core[™] substrate, which meets the following standards; ASTM E84, ASTM 5166, & ASTM D6196. Explore the most popular 50 colors from the latest fabric line.
